

## Athan Complete Scanner Assembly for Digital Beta and High Definition Machines

- Lasts 3 times longer than original OEM scanner.
- Upper scanner surface is hard plated with air grooves for smooth tape travel and longer life.
- Upper scanner is precision ground (TIR .00005).
- Upper scanner position is optimized to maximize life of inner drum.
- Rabbet guide is made of hard material (not aluminum like the OEM) for longer life.
- Includes new Athan encapsulated slip ring assembly.
- New inner drum is indicated with precision to maximize head life and performance.
- Includes oscilloscope print-out of RF envelope verification

**PATENT  
PENDING**
